

Deal of the Decade

“It is highly likely that practices that want to continue to provide NHS care after a new contract is introduced in April 2014 will need to have an IT clinical system.” –

quote from the BDA

Do you think that the big Dental Software Suppliers are going to lower their prices or the government give a subsidy to help you buy a suitable computer system? **No.**

Beat the rush and get an incredible deal on price. We are offering our 1 to 4 user systems complete with Hardware and Installation at very special prices. The software is our full charting version with Web EDI transmission. You don't have to start using the full charting software immediately; you could start off using it as a recall or billings system.

As we don't know to what level you will initially use the system, we have separated the training requirement. Each system comes with an initial training session of two hours included. Then additional half day sessions can be purchased separately as required.

(Typically a Billing system may need one additional session and the charting with EDI, Two Sessions)

We are restricting our offer to the first twenty practices that order any of our systems. The cost of each respective system is detailed below.

The price **includes** a Fujitsu **PC Server**, Wide Screen **Monitor**, Volume **backup Drive**, 5 x USB Data **Backup Pens**, Broadband **Router**, Laser **Printer**, **Remote Access** Software, AVG **Anti-Virus** Software, **Installation**, **Cabling** as required, additional **workstations** as applicable and a two hour **training** session.

Total Number of Workstations	Total Initial Cost	Monthly Software Support	Monthly Hardware Maintenance <i>(Optional)</i>
One	£ 1,649	£ 36	£ 23
Two	£ 2,349	£ 54	£ 28
Three	£ 2,995	£ 72	£ 33
Four	£ 3,476	£ 90	£ 38

Additional Half Day training Session at the practice, £ 300

Additional extras such as:

Microsoft Office, Slip Printers and Scanners all at competitive prices.

All prices exclude VAT

Please call us to arrange a no obligation demonstration.
