

# Shire Dental Software

## JANUARY SALE

**Shire Dental Software: £ 36 + VAT per month for One Surgery**

**Additional Surgeries are £ 18 +VAT per month**

No on-going charge for additional workstations

The price includes full software support and free software Updates.

Initial software installation and Training session **£ 295 + VAT**

Initial Cost for additional workstation £ **36 + VAT**

The above prices are for using your existing or providing you own hardware.

We can also provide exceptionally competitive hardware and services. Many practices like the peace of mind and convenience of a “**One Stop Shop**” for both initial system and on-going maintenance. We can provide this, please turn over for details.

# Shire Dental System

Some practices may already have suitable hardware or prefer to purchase locally or on-line. Please see our recommended Hardware specification on our website.

For practices that need to purchase Hardware, you may be surprised how competitive we are. The local Superstore may be cheaper, but ask them for a quote to come and install it and get your network working.

You may also be able to purchase an extended warranty, but does that guarantee to have your system up and running again within 8 working hours? Our optional Maintenance contract guarantees to fix or provide a loan. We will load all the programs and restore backups all as part of the service.

Our optional "One Stop Shop" means that you only have one point of contact in the supply, commission, install and on-going maintenance. Most practices prefer the peace of mind we offer.
